

Equestrian Buildings

Animal Welfare is key in the design and layout of any building used to house animals. Therefore, by working together we can create a building to suit both you and your horse.

Steel American Barns provide an excellent environment for the horses as well as their owners. They are light and airy at all times allowing the management of the horses to be carried out easily despite the weather conditions outside.

Our buildings are designed to be strong, durable and long lasting at the same time keeping them affordable and good value for money.

We supply and fit a range of internal stables according to your requirements.

DSD Buildings Ltd are able to extend existing buildings and match in the materials wherever possible so that visually the building looks the same throughout. We are also able to cover outdoor arenas.

Your building can include any of the following:

- *Wash Boxes*
- *Foaling Boxes*
- *Feed and tack rooms*
- *Rest Rooms*
- *Toilets*

DSD Buildings Ltd

“DSD Buildings recently added an extension to a barn used as stables for us, which more than doubled the size of the building; they also added skylights in the roof of the existing section. Not only did they complete the work on time, despite many alterations to the plans, the work was carried out to a very high standard, and the new blends in with the old perfectly”

Tony Jefferson, Property Manager, Oxfordshire

“DSD Buildings built a stable block for my polo yard according to the plans I provided. This included composite panels in the roof for added insulation. The work was carried out to a very high standard and I would be very happy for them do further work for me in the future”

Mr A Bennett, Fyfield Polo Club, Windsor
